

Nokia 1AB396080001 Datasheet

Nokia 1AB396080001 WOTRBVRTAA High Speed Attenuator SFP Module

1AB396080001

The Nokia 1AB396080001 is a compact, hot-swappable SFP optical transceiver delivering reliable performance.

Features

- Fully with Nokia and industry-standard equipment.
- Low power consumption and minimal heat dissipation for energy-efficient operation.
- Hot-swappable SFP design with DDM/DOM monitoring.

Specifications

- Model: Nokia 1AB396080001
- Form Factor: SFP
- Brand: Nokia

Applications

- Telecommunications and ISP backbone infrastructure.
- Video surveillance and broadcast signal transmission.
- Cloud computing and hyperscale data center interconnects.
- Long-distance fiber-optic links in demanding environments.
- Storage area networks (SAN) and server connectivity.
